SUMMARY

Aspiring Data Science Engineer & Full-Stack Web Developer with a strong academic background in Artificial Intelligence & Machine Learning. Experienced in building scalable web applications and AI-driven solutions through hands-on projects. Proficient in Python, JavaScript, and modern frameworks like React.js. Adept at problem-solving, debugging, and integrating frontend with backend systems. Seeking entry-level opportunities to contribute to innovative global teams.

EDUCATION

Bachelor of Technology (B.Tech) in Artificial Intelligence & Machine Learning,

India

Dr. APJ Abdul Kalam Technical University, India

- CGPA: 6.5
- Final Year

Class 12 & 10, CBSE Board

TECHNICAL SKILLS

Languages

Python, Java, C++, C, JavaScript

Web Technologies

HTML, CSS, React.js, REST APIs

Databases

MongoDB, SQL

Tools

Git, GitHub, VS Code, Anaconda, MS Excel

Concepts

Data Structures, Machine Learning Basics, API Integration, Debugging

PROJECT EXPERIENCE

Zomato Clone, Full-Stack Web Application

- Developed a responsive food delivery platform using React.js
- Integrated frontend with backend services and APIs
- Improved UI/UX performance and responsiveness across devices

Snap Video, Data Science Project

- Built an AI-based video generation system using machine learning techniques
- Automated content creation workflows for enhanced efficiency
- Applied data preprocessing and model integration concepts

PORTFOLIO

Personal Portfolio Website

- Showcasing live projects and technical skills
- Includes full-stack applications and AI-based solutions

- Demonstrates practical implementation of real-world problem solving

ADDITIONAL INFORMATION

Soft Skills

- Strong team collaboration and communication skills
- Quick learner with adaptability to new technologies
- Committed to delivering high-quality and reliable solutions
